

# 2U Video Wall Controller

## DMC9000-2U-V3

## Features

- FPGA architecture and Uniview's core image processing strategy provide excellent image processing performance. Embedded Linux OS ensures 24/7 stable operation and protects the device from hackers and viruses.
- Plug-in design for boards provides flexible board application and makes the upgrade、expansion and maintenance of the system easier.
- Advanced PCIe switching chip in the industry. Each signal has a dedicated transmission channel、which ensures the real-time display of images of all signals. And a service board can be inserted into any service board slot、which allows users to apply boards flexibly.
- Resolution Real-time Total Adaptation technology. Each device supports four video walls with different resolutions、and the resolution can be customized.
- Supports window opening、roaming and zooming at any position on the video wall. The unique video processing algorithm ensures that the image quality is not affected during zooming.
- Supports "Picture-in-Picture" mode、which allows users to watch videos on top of other windows、presenting flexible layouts.
- Supports saving the video wall layout as a scene、so that the layout can be used at any time later. Up to 64 scenes can be saved. Supports scene sequence.
- Intelligent temperature control design of fans keeps the heat dissipation and noise at an ideal level、and ensures the noise is no more than 30 dBA in conference rooms.
- Intelligently monitors board power supply and board temperature. When abnormal board power supply or temperature is detected、the board will automatically shut down to safeguard device operation.
- Supports small pixel pitch LED displays.
